

# Vineyard Industry Products Introduces the Lazer Star Night Harvest LED Tower

September 1, 2018

Make your night harvesting more efficient and more affordable with the new Lazer Star Night Harvest LED Tower. The unique tower attaches to the category 2 three-point hitch on your tractor and connects to the stock electrical system. It runs off the stock alternator in most applications.

The light tower utilizes the LED lighting technology offering 560 total watts and 84,000 raw Lumen, with the ability to light up approximately five vineyard rows. The tower features height and width adjustability ranging from 10' tall by 5'4" wide while collapsed and 13'11" tall by 10' wide at full expansion. Includes free-standing storage base, forklift pickup points and yellow powder-coat finish. Additional accessories include 30-watt LED driving and bin lights.

Production is limited for the 2018 harvest. To guarantee delivery, order soon by calling José or Michael @ 707.837.5410.
